**THE BIBLE ON CONSCRIPTION**  
(Cont. from page 5)

Canaan. As members of various tribes the Hebrews were interested in issues of a sectional rather than a national nature. Many a time the members of one tribe were reluctant to help another tribe when danger confronted the latter only the plea of faithfulness provided the necessary loophole. As it has been mentioned earlier, it was not until the time of Saul, when a national emergency forced the issue, that a total draft was brought into the picture.

On the other hand, this decree, as well as the other three conditions, constituted a policy of strict selection for the purpose of creating a fighting force of high morale and calibre. Examinations for physical fitness were neither as thorough nor as scientific as those given to new recruits today. A suitable frame of mind counted as much as physical endurance and stamina. It was readily seen that a man taken away to war while in the midst of attaining some personal, peace-time goal would not be able to centre his thoughts on military strategies.

On the whole it may be said that the approach of the Old Testament toward the question of conscription is far more liberal than the attitude of modern times. But times and view-

points are constantly changing, and the proper approach will probably remain a question mark until, as Isaiah puts it, "nation shall not lift up sword against nation, neither shall they learn war any more."

**SHABBOS SHMOOS**

**Threat**  
Mankind is today face to face, not with regional wars or isolated conflicts, but with an organized, ruthless and implacable movement of steadily expanding conquest. We are in the presence of forces which are not restrained by considerations of law or principles of morality; which have fixed no limits for their program of

conquest; which have spread over large areas on land and are desperately struggling now to seize control of the oceans as an essential means of achieving and maintaining their conquest of the other continents.

Control of the high seas by law-abiding nations is the key to the security of the Western Hemisphere in the present-day world situation. Should that control be gained by the partners of the tri-partite pact, the danger to our country, great as it is today, would multiply manifold.—Secretary of State Hull.

**Discrimination**  
Last year we enacted a law which prohibited discrimination on account of race, color or creed in all labor unions and labor organizations. I urge that at this session we eliminate the vicious practice of discrimination in all businesses affected with a

public interest. While not to the extent found elsewhere, discrimination does exist here in the State of New York. I look with profound distaste upon distinction based on race, color or creed.

In this connection I should like to call your attention to protests which have come to my desk concerning racial discrimination by defense industries in selecting their employees.

The foundations of American democracy are weakened by those engaged in subversive activities and of course, no employer desires the services of one who does not believe in American principles. But I am convinced that the foundations of democracy are equally weakened by those who engage in racial discrimination; by those who fail to give equal opportunity to American citizens regardless of race, color or creed.—Governor Herbert H. Lehman.

**Laurentian Mountains Outstanding Ski-Ground**

Eastern Canada's greatest winter playground. The growth of winter travel to the Laurentian ski-ground is best shown by rail traffic figures, since highway travel is negligible because of the deep snow. A dozen years ago it was a big week-end if 1,000 people went to the mountains; and few of them were skiers. Last winter the Canadian Pacific Railway took 143,500 skiers to the Laurentians on week-end ski trains. This winter approximately 20 regular and special Canadian Pacific ski trains will take nearly 10,000 skiers to the Laurentians every week-end.

Real reason for the development of the district into Canada's favorite ski-ground, in addition to its nearness to Montreal and its

facilities and terrain, is the happy route of the Canadian Pacific Railway through the heart of the mountains. The railway stations are within a few miles of each other all along the line, making cross-country ski-ing a delightful adventure possible in hard or easy stages for skiers of all ages. Then there is sport for skiers of every degree of aptitude because of the varied offerings of wooded and open country, slopes at every imaginable angle, hundreds of miles of marked ski trails up hill and down dale, cleared hills with ski jumps and breath taking downhill runs for competitions. Cold, dry air and generous helpings of snow complete a perfect ski picture.
