

# IT'S TIME TO MODERNIZE—RENOVATE—BEAUTIFY

Following a typical western Canadian winter there are plenty of tasks for the home owner to consider — his wife must scour walls, curtains and dark corners — the lawn and garden must be planned or readied for the summer, home equipment must be repaired, replaced or purchased. A home beautification program must be undertaken in order

to fully enjoy the summer ahead. Your present home may not lend itself to easy and inexpensive transformation into the lovely California

ranch-style cliff-hanging types of homes. Certainly, the view of the Pacific cannot be brought in through your picture window. But, for the

homeowner with vision, the same comfort and same facilities for happy family living can be derived, regardless of the age of his home with the addition of smart new doors

or windows, a recreation room, an extra bedroom, a bathroom, family rumpus room, the changing of a wall, extending a patio in to the private garden, or little touches here and there which with a little imagination can make the house a most beautiful home.

Modern structural materials and know-how make such apparently extensive alterations both relatively inexpensive and simple to undertake. Tile, linoleum, patterned ply-

wood, etc., in addition to economy, introduce the informal and modern note so much in demand today.

The construction season has started. Winnipeggers are already considering ideas for completing their homes and starting on repairs and renovations, so that full summer enjoyment may be derived from the completed home during the hot summer spell.

Whether it is a major job of redoing an interior, or simply checking a room; whether it is a big renovation on the outside, or simply adding the touches which enhance the appearance of the home—large or small—Winnipeggers will find firms listed on these pages reliable, and happy to offer advice without obligation.
